## Patient Information Findings

Distraction Index (DI):Right DI = 0.30, Left DI = 0.19. Osteoarthritis (OA):No radiographic evidence of OA for either hip. Cavitation/Other Findings:None. Distraction Index (DI):Right DI = 0.30, Left DI = 0.19. Osteoarthritis (OA):No radiographic evidence of OA for either hip. Cavitation/Other Findings:None.
--

## Findings Interpretation

Distraction Index (DI):The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.30.
--

OA Risk Category:The DI is less than or equal to 0.30. This patient is at minimal risk for hip OA.  
Distraction Index Chart:

**Breed Statistics:**This interpretation is based on a cross-section of 39 canine patients of the EPAGNEUL BRETON breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.26 - 0.75) for the breed. The breed average DI is 0.53 (solid square). The patient DI is the solid circle (0.30).

**Summary:**The degree of laxity (DI = 0.30) falls within the central 90% range of Dis for the breed. This amount of hip laxity places hip at a minimal risk to develop hip OA. No radiographic evidence of OA for either hip.
